SUMMARY

Full-stack developer with 5+ years of experience building scalable logistics and e-commerce platforms. Specialized in React, Node.js, and .NET, with proven impact on performance optimization, workflow automation, and business growth.

EXPERIENCE

Full Stack Developer

Dimotrans Group

October 2021 – November 2025

- Designed and deployed advanced workflow management features in logistics platforms using JavaScript, React, and Node.js, boosting user transaction throughput by **40%** and driving a **25% quarterly revenue increase** over 36 months.
- Enhanced multi-channel commerce capabilities by customizing NopCommerce with payment integration, inventory automation, and customer account management, contributing to **€1.2M+ in annual revenue (2025)**.
- Developed and integrated a production-ready conversational ChatBot into the WMS using .NET and modern JavaScript frameworks, improving operational responsiveness and user self-service.
- Mentored junior developers and apprentices in JavaScript, .NET, React, and SQL, accelerating onboarding and improving project autonomy.
- Strengthened team performance through rigorous code reviews and pair-programming practices, ensuring consistent code quality, maintainability, and adherence to engineering standards.

Software Developer

Energy Consult

April 2021 – September 2021

- Designed and delivered a 2D building-modeling application to calculate energy performance, reducing manual calculation time by **35%** and improving assessment accuracy by **20%**.
- Built and deployed a contract-management web application using JavaScript and Node.js, streamlining internal workflows and decreasing processing time by **40%**.
- Collaborated with IT team members to design and implement cross-platform features using C#, JavaScript, and React, improving system stability and user satisfaction by **25%** through faster page loads and fewer support tickets.

Data entry operator

Bonbons Barnier

October 2019 – December 2019

- Performed large-scale data entry and validation for ERP migration, processing over **5,000+ records** with **99% accuracy**, ensuring reliable system integration.
- Created structured documentation for data entry and validation procedures, improving onboarding efficiency for new team members by **25%**.
- Coordinated with the ERP project team to validate migrated datasets, helping reduce post-integration data discrepancies by **35%**.

SKILLS

Technical Skills: C#, .NET, React, Node.js, Docker, Typescript, SQL, NOSQL, CI/CD

EDUCATION

Master's Degree in Software Architecture & Information Systems Management

CESI · Rouen France · 2025

Bachelor's Degree in Application Design & Development

CESI · Rouen France · 2023

Associate Degree in Software Development

CESI · Rouen France · 2022

Bachelor - IT Development

UFR Science et Techniques · Rouen France · 2020

High School Diploma - STI2D

Ferdinand Buisson · Rouen France · 2019
